

Test Document - Page 1

This is a generated sample PDF used to verify the
upload -> parse -> persist pipeline end-to-end.

It contains a real text layer so PyMuPDF can extract
text and write DocumentElement rows into the database.

Test Document - Page 2

This is a generated sample PDF used to verify the
upload -> parse -> persist pipeline end-to-end.

It contains a real text layer so PyMuPDF can extract
text and write DocumentElement rows into the database.

Test Document - Page 3

This is a generated sample PDF used to verify the
upload -> parse -> persist pipeline end-to-end.

It contains a real text layer so PyMuPDF can extract
text and write DocumentElement rows into the database.
